

Team Lead Corporate IT (m/f/d)

Springtime Technologies is growing, and we are looking for a Team Lead of Corporate IT (m/w/d) to take ownership of our internal IT organization.

We're seeking a leader with strong expertise in corporate and end-user IT, and a sharp focus on service quality, security, and team development.

The ideal candidate brings hands-on leadership experience across corporate infrastructure, workplace IT, service desk operations, and vendor management, and is ready to lead a team responsible for internal IT services such as collaboration platforms, identity & access management, and device management across the organization. This role will work closely with IT Operations, Cloud Platform Engineering, and business stakeholders to align corporate IT strategy with company objectives and manage the operational lifecycle of internal IT services.

In this role, you will be responsible for leading and further building the Corporate IT team, setting priorities, and ensuring high-quality, secure, and reliable IT services for all employees. You'll manage vendor relationships, and projects, drive continuous improvement, and ensure compliance and governance across the corporate IT landscape.

Your Responsibilities

- Lead and develop the Corporate IT team, including hiring, coaching, and performance management.
- Own the strategy and roadmap for corporate and end-user IT services (workplace, collaboration, identity & access management, device management).
- Ensure reliable, secure, and efficient operation of corporate IT infrastructure and services, including service desk and IT support.
- Collaborate with IT Operations, Cloud Platform Engineering, and business stakeholders to align corporate IT with company-wide technology initiatives.
- Manage vendor and partner relationships, including contract negotiations and service-level management.
- Drive IT service management processes (incident, problem, change, and request management) and continuous improvement.
- Contribute to projects to ensure compliance with regulatory requirements (e.g., ISO 27001, NIS2, GDPR) and further development of the ISMS.
- Own the IT security posture for corporate and end-user environments, in coordination with IT security and Cloud Platform teams.
- Manage cost forecasting, and cost optimization for corporate IT.
- Communicate IT strategy, projects, and performance to management and relevant stakeholders.

Your Profile

- Several years of leadership experience in Corporate IT, IT Operations, or a similar role, including direct team management.
- Strong knowledge of workplace and end-user IT, identity & access management (e.g., Entra ID), device management, and IT service management (ITSM/ITIL).
- Experience managing and optimizing IT costs, vendors, and contracts.

Seniority Level: Professional/Experienced

Location: Vienna, Austria (Hybrid)
